

# Claims

[c1] What is claimed is:

A capsule that contains liquid and/or dry material to be subsequently dispensed into a container comprising:  
a capsule body that is impervious to liquid;  
said capsule body, including a first member and a second member, said second member moveable mountable in said first member;  
said capsule first member body having a top opening and a sealed closed bottom with lines of weakening and a vertical plunger tube connected thereto;  
said second member having a sealed closed top and an open bottom; and  
said first and second members in a first mode are sealed forming said capsule body preventing any liquid or dry material from escaping from the capsule body.

[c2] A capsule as in claim 1, wherein:

said first member is cylindrical and said second member is cylindrical; and  
the inside diameter of said first member being larger than the outside diameter of the said second member.

[c3] A capsule as in claim 2, wherein:

said first member side cylindrical wall and said sealed bottom having a joined area of weakened material around its periphery, for rupture by said second member engaging said plunger tube.

[c4] A capsule as in claim 2, wherein:  
said first member inside wall has a sealing means that engages said second member.

[c5] A capsule as in claim 1, wherein:  
said second member having a removeable area to form an aperture for inserting a straw.
